CONTENTS OF VOL. IX.

No. XVII.

ANALYTICAL AND CRITICAL REVIEWS.

I. De l'Emploi de l'Opium dans les Phlegmasies des Membranes Muqueuses, Séreuses et Fibreuses. Par J. L. Brachet, Médecin de l'Hotel-Dieu, &c. de Lyons; Membre de la Société Royale de Médecine, &c. &c. Ouvrage couronné en 1825, par la Société Médico-Pratique de Paris. Suivi d'un Memoire sur les Fièvres Intermittentes. Paris, 1828. Pp. 404.
Observations on the Use of Opium in Inflammations of the Mucous, Serous and Fibrous Membranes. Ry J. L. Brachet, M.D. &c. 13

II. A Treatise on Pathological Anatomy. By William E. Horner, M.D. Adjunct Professor of Anatomy in the University of Pennsylvania, Surgeon at the Infirmary of the Philadelphia Alms House, Member of the American Philosophical Society, &c. 31

III. Les Médecins Francais Contemporains; par I. L. H. P***. 1re. et 2me. Livraisons. 8vo. Pp. 112. 109. Paris.
French Cotemporary Physicians. By I. L. H. P***. 1st & 2d Parts. 8vo. &c. 55

IV. Reflections on the Treatment of Fractures of the Lower Extremity, and a Description of a New Apparatus—with Cases. By J. Amesbury, Member of the Royal College of Surgeons. London, 1822.
Observations on the Nature and Treatment of Fractures of the Upper Third of the Thigh Bone, and of Fractures of Long Standing; illustrated by Cases obtained from public and private practice. Second Edition with an Appendix. By J. Ames-

bury, Consulting Surgeon to the Royal Union Association; Surgeon to the South London Dispensary; Lecturer on Surgery, &c. 8vo. pp. 320. London, 1829. 74

V. Sullo Stato Attuale della Nuova Patologia Italiana. Considerazioni del Professore Giacomo Tommasini, &c. &c. Edizione Seconda. Milano. 1827.
Observations on the Real State of the New Italian Pathology. By G. Tommasini, &c. &c. 101

VI. Die Physiologie als Erfahrungswissenchaft. Bearbeitet von Karl Friedrich Burdach, mit Beiträgen Von Karl Ernst von Baer, Heinrich Rathke und Ernst H. F. Meyer. Band I. Pp. 606. Leipzig, 1826. Band II. Pp. 758, 8vo, 1828.
Physiology as an Experimental Science. By Charles F. Burdach, with Contributions from Charles E. Von Baer, Henry Rathke and Ernest H. F. Meyer, Volumes I and II. . . . 109

VII. Acta Nova Regiæ Societatis Medicæ Havniensis. 122

VIII. Manual for the Use of the Stethescope. A short Treatise on the different methods of investigating the Diseases of the Chest. Translated from the French of M. Collin. By W. N. Ryland, M.D. 126

ORIGINAL COMMUNICATIONS.

IX. Observations on Pulmonary Consumption. By Joseph Parrish, M.D. 145

X. Case of Ovarian Pregnancy. Communicated by D. Francis Condie, M.D. 155

XI. Case of Gonorrhœa, alternating in a singular manner with Bilious Remittent Fever; accompanied by Reflections. By Lewis Campbell, M.D. of Moutton, Alabama. 160

XII. Case of Croup followed by Colic, Convulsion and Inflammation, and terminating favourably. By F. R. Gregory, M.D. of Lombardy Grove, Virginia. Communicated in a Letter to one of the Editors. 162

XIII. Reports of Selected Cases, occurring in the Hospital of the Walnut Street Prison. By Franklin Bache, M.D. Physician to the Prison:— 164
Case of Aneurism of the Aorta, its Rupture, and Sudden Death.

Cases of Pneumonic Inflammation, attended with the copious Expectoration of Pus, and ending in Recovery.
Case of Empyema, in which Paracentesis Thoracis was performed.

XIV. A Case of Acute supervening on Chronic Arachnitis, attended with symptoms of nervous irritation without fever. Death in consequence of a fall. By R. La Roche, M.D. 176

QUARTERLY SUMMARY OF MEDICAL INTELLIGENCE.

I. Anatomy.—1. Triple Origin of the Vertebral Artery. 2. Monster. 188

II. Physiology.—3. Capacity of the Lungs. 4. Dr Wedemeyer on the Circulation. 5. Galvanism Developed by the Nerves. 6. Dr Lee on the Functions of the Liver and Intestines in the Fœtus. 7. Pulmonary Insufflation for Asphyxia. 189

III. Pathology.—8. Caries of the Alveolar Process of the Upper Jaw, with the Reproduction of the Jaw Teeth, after its Cure. 9. Case of Metastasis. 10. Hypertrophy of the Heart.—Ossification of its Valves.—Aneurism and Ossification of the Aorta. 11. Morbid appearances in the Brain, after frequent attacks of Apoplexy. 12. Acute periodical Asthma of Miller. 13. Sounds produced by the healthy action of the Heart. 14. Dropsy from Diseased Kidneys. 15. Mortality of Children from Cold. 16. Case of Congestion of the Cerebellum, with involuntary walking backwards. 17. Case and Preparation, exhibiting the creamy matter called "Muguet" in the small intestines. 194

IV. Therapeutics.—18. Case of Dropsy treated by Extensive Depletion—cured. 19. Ergot in Intermittent Fever. 20. Case of Traumatic Tetanus successfully treated. 21. Tetanus cured by the Acetate of Morphia applied externally. 22. Sulphate of Copper as a Remedy in Croup. 23. Power of Sulphate of Quinine in accelerating Mercurial Action. 24. Chlorides, Properties of, in preventing the Propagation of Plague. 25. Intestinal Obstruction successfully treated by Mechanical Means. 26. Treatment of Phthisis Pulmonalis by Chlorine. 27. Mode of preventing Delirium Tremens in the House of Correction of Boston. 28. Treatment of Gonorrhœal Ophthalmia. 29. Description of Ophthalmia Neonatorum. 30. Iodine in Scrofula. 31. Iodine. 32. Opium in Rheumatism. 33. Nitrate of Silver. 34. Arsenic in Disease of the

Bones. 35. Calomel in Croup. 36. Rhus Glabrum as a Remedy for Ptyalism. 202

V. Medical Jurisprudence.—37. Note on Arsenious Acid in a Medico-Legal point of view. By M. Orfila. 38. Toxicological account of Hydrocyanic Acid. 39. Poisoning by the Acetate of Morphia. 214

VI. Surgery.—40. Fungus Hæmatodes of the Tongue removed by Ligature. 41. Osteosteatoma of the Fore-arm unconnected with the Bone. 42. Ovarian Dropsy cured by an Operation. 43. Quarterly Report of the Edinburgh Surgical Hospital. 44. Neuroma: Tumour of a Nerve. 45. Ligature beyond an Aneurismal Tumour. 46. Extirpation of the Uterus. . . . 219

VII. Midwifery.—47. Tumour in Vagina after abortion, mistaken for the Placenta. 48. Cephalotripsy (Céphalotripsie). . . . 226

VIII. Materia Medica and Pharmacy.—49. Sarsaparilla. 50. Virginia Snake root. 51. Ergot of Maize. 52. Active Medicinal Principle recently discovered in the Root of the Chiococca Racemosa. 53. Male Jalap. 54. Myrrh the Product of the Balsamodendron Myrrha. 55. Test of Myrrh. 56. Chloride of Zinc, employed internally and externally. 57. Alkaline Principles in the Bark of the Willow. 58. Chlorine, Iodine, and Bromine, Antidotes to the Vegetable Alkalies. 59. Galls an Antidote to the Vegetable Alkalies. 60. Epispastic Ointment from Mezereon. 227

IX. Chemistry.—61. New Mode of Preparing Sheet Caoutchouc. 62. New Element, Bromine. 63. Discovery of a New Earth, by Berzelius. 64. Iodide and Chloride of Nitrogen. 65. On Kinic Acid and its Combinations, by MM. Henry, Jun. and A. Plisson. 233

MISCELLANEOUS ARTICLES.

Medical Politics.—Medical Statistics.—Philadelphia Medical Institute.—Association for Medical Instruction.—Medical Instruction.—Notices of Books in Press.—Meteorological Journal, for the year 1829, kept in the city of Philadelphia. 236

No. XVIII.

ANALYTICAL AND CRITICAL REVIEWS.

I. Delle Mallattie del Cuore, loro Cagione, Specie, Segni, e Cura: di Antonio Giuseppe Testa. Edizione Seconda. Tom. 3. Firenze, 1823.

Of the Diseases of the Heart, their Causes, Varieties, Symptoms and Cure. By A. G. Testa, M.D. Professor, &c. Florence, 1823. . 241

II. Journal of the Philadelphia College of Pharmacy, Volume I. Philadelphia, 1830. 278

III. Traité de la Coqueluche, d'apres les principes de la doctrine Physiologique. Par H. M. J. Desruelles, D.M. &c. &c. Ouvrage couronné par la Societe Medico-Pratique de Paris. 1827. 8vo. Pp. 356.

H. M. J. Desruelles, Doctor's der Medicin, u. s. f. Abhandlung uber den Keichhusten nach den Grundsatzen der Physiologischen Lehre verfasst. Aus dem Franzoischen ubersetzt und mit Anmerken begleitet. Von Gerhard Von dem Busch. Doctor der Medicin und Chirurgie, u. s. f. Bremen. 1828. 8vo. Pp. 316.

A Treatise upon the Hooping Cough—agreeably to the principles of the Physiological Doctrine. By H. M. J. Desruelles, M.D.

The same translated into the German, with notes. By G. Von dem Busch, M.D. 292

IV. An Introduction to the Practice of Midwifery. By the late Thomas Denman, M.D. Licentiate in Midwifery of the College of Physicians, London, and Honorary Member of the Royal Medical Society at Edinburgh. From the sixth London edition, with a Biographical Sketch of the Author. Third American edition, illustrated with numerous engravings: with notes and emendations. By John W. Francis, M.D. Professor of Obstetrics and Forensic Medicine in Rutgers Medical Faculty, Geneva College, New York; Member of the Medical and Chirurgical Society of London; of the Wernerian Natural History Society of Edinburgh; of the Academy of Natural Sciences of Philadelphia; of the Lyceum of Natural History of New York; of the Literary and Philosophical Society of New York, &c. New York, 1829. Pp. 776, 8vo. 300

Contents.

V. The Influence of Climate in the Prevention and Cure of Chronic Diseases, more particularly of the Chest and Digestive Organs: comprising an account of the principal places resorted to by invalids in England and the south of Europe; a comparative estimate of their respective merits in particular diseases; and general directions for invalids while travelling and residing abroad. With an Appendix, containing a series of Tables on Climate. By James Clark, M.D. Member of the Royal College of Physicians of London. 8vo. Pp. 308. London, 1829. 313

VI. Pathological Observations, Part II. on Continued Fever, Ague, Tic Doloureux, Measles, Small Pox, and Dropsy; illustrated by cases noted in the year 1828, from hospital and private practice; with a preliminary Dissertation on the Institutes of Medicine; and an Appendix on the origin, prevention, and cure of organic diseases, especially of the viscera of the cranium, thorax, and abdomen; illustrated by cases and post mortem Examinations. By William Stoker, M.D. &c. &c. Dublin, 1829. 8vo. pp. 407. 332

VII. A Manual of Materia Medica and Pharmacy, comprising a concise description of the Articles used in Medicine, their Physical and Chemical Properties, the Botanical Characters of the Medicinal Plants, and the Formulæ for the Principal Officinal Preparations of the American, Parisian, London, Dublin, Edinburgh, &c. Pharmacopœiæ. By H. M. Edwards, M.D. and P. Vavasseur, M.D. Paris, 1828. Translated from the French, with numerous Additions and Corrections, and adapted to the practice of Medicine and the Art of Pharmacy, in the United States, by Joseph Togno, M.D. and E. Durand. Philadelphia. Carey, Lea and Carey. 1829. Pp. 523. . 349

ORIGINAL COMMUNICATIONS.

VIII. A Sketch of the Variolous Epidemic which prevailed at Wilmington, Delaware, in the years 1827 and 1828. By Henry Gibbons, M. D. 355

IX. History of a case of Puerperal Convulsions. By Thomas T. Howson, M.D. 368

X. Case of Catalepsy. By Charles D. Meigs, M.D. 372

XI. A Summary of the Climate and Epidemics of Savannah during the series of years from 1826 to 1829. By William R. Waring, M.D. . 374

XII. Observations on the Endermic Application of Medicines. By William W. Gerhard, M.D. 392

QUARTERLY SUMMARY OF MEDICAL INTELLIGENCE.

I. Anatomy.—1. Nerves of the Placenta. 2. Urachus. 3. Mummies. 4. State of the Uterus eight years after the performance of the Cæ-

Contents.

sarian Operation. 5. Lymphatics and Veins communicate with each other. 403

II. Physiology.—6. Abnormal Menstruation. 7. Longevity. 8. Aromatic principle of the Blood. 9. Wedemeyer on the Circulation. . 405

III. Pathology.—10. Case of Ascending Paralysis, with the Appearance after Death. 11. Croup in an Adult. 12. Hydrothorax—Atrophy of the Right Lung—Diaphragm Cartilaginous. 13. Epidemic Dothinentery. 14. Inflammation of the external parts of Generation in a pregnant Female, terminating in Suppuration and Death. 15. Bone found in the Heart. 16. Case of Extraordinary Hypertrophy of the Heart. 17. Cases of Apoplexy. 18. Pus found in the heart of patients destroyed by Phthisis Pulmonalis. 19. Abscess of the Lungs opening externally. 408

IV. Therapeutics.—20. Due Administration of Blood-letting. 21. Strychnia in Paralysis. 22. Strychnia in Chronic Diarrhœa and Amenorrhœa. 23. Stimulants in Delirium unconnected with Inflammation. 24. Paraplegia after Apoplexy, removed by the Moxa and Nux Vomica. 25. Tetanus Nascentium successfully treated. 26. On the Efficacy of Water Dressing, or the utility of water as an application in the treatment of wounds, ulcers, diseases of the skin, &c. 27. On the Use of the Oil of Turpentine. 28. Acetate of Morphia applied externally. 416

V. Medical Jurisprudence.—29. Infanticide. 30. Poisoning with Opium. Uncertainty of the Chemical Analysis. 425

VI. Surgery.—31. Tracheotomy. 32. Extirpation of the Uterus. 33. Twisting arteries for arresting Hemorrhage. 34. Indolent Ulcers. 35. Wounds of the Brain. 36. Hemorrhage from an Ulcer in the Fauces; Ligature to the common Carotid. 37. Artificial Anus. 38. Diseases of the Spine. 39. Portion of Bone lodged for forty-eight hours in the Trachea of an Infant. 40. Aneurism; Ligature beyond the Tumour. 41. Hydro-rachitis. 430

VII. Midwifery.—42. Extra-Uterine Pregnancy. 43. Cæsarian Operation per Vaginam. 44. Rupture of the Perineum. 45. Imperforated Uterus. 437

VIII. Materia Medica and Pharmacy.—46. Salicine. 47. Cainca. 48. Variolaria Amera a substitute for Cinchona. 49. Nicotin, the Active principle of Tobacco. 50. Copaiba. 51. Jalap the product of an Ipomæa. 52. Powerful Hydragogue Cathartic from the Momordica Operculata of Linnæus, the Koosia or Kusia of the Indians. 53. Effects of Camphor on the System. 54. Asparagus a Sedative. 55. The Anti-scrofulous Liquor of Kœchlin. 56. Effects of Iodine. 57. Quercia, a peculiar Principle in Oak Bark. 438

Contents.

IX. Chemistry.—58. New Vegetable Alkali, discovered by Pelletier. 59. On Iridium and Osmium, by J. J. Berzelius. 60. Analysis of Bile, by Braconnot. 445
